

Adding excellence to your **Brand**

Manufacturer & Exporter of
PVC Shrink Label Film

Elegant **Shield** for Brand's Build

Company Introduction

Beauty attracts; be it a person's beauty, nature's beauty or a product's beauty. The manner in which a product is packed and presented for sale has a huge impact on customers. A survey has proven that products with attractive, eye-catching & high-quality packaging have a higher chance of being selected than products with inferior appeal, even though their prices may be slightly higher.

We, at **Centroid**, simply assist you in creating your branding on labels much more appealing & elegant. Centroid is a market leader in the field of Blown PVC Shrink Label Film manufacturing, dealing in Quality PVC Shrink Label Film. Established in 2016 with an initial capacity of approximately 100 tons, Centroid has successfully completed its third expansion and now proudly stands as the largest manufacturer in the sector, boasting a monthly capacity of more than 350 tons and a maximum width of 1000 mm. CENTROID is dedicated to adding value to your products on time. We use exclusive imported machinery with advanced technology to ensure unmatched quality, high production, and precise PVC film specifications. We are committed to providing premium solutions for PVC shrink label manufacturers. At Centroid, our operations are anchored in the principles of consistent high quality and punctual delivery, truly embodying our motto: "Adding Excellence to Your Brand."

Human Capital & Team Excellence

At **Centroid**, we firmly believe that our human capital is our greatest strength and the key to our success. In today's competitive landscape, while rival companies may understand each other's strategies, they cannot replicate the unique and integrated skill set within our organisation. Our team consists of seasoned professionals and highly skilled & qualified personnel with extensive experience in operating advanced machinery and making informed decisions that drive the company forward. We are committed to nurturing and empowering our people, encouraging them to take on new initiatives and meet any challenges with confidence. It is the expertise, knowledge, and dedication of our team that underpin Centroid's growth, enabling us to deliver prompt, tailored solutions and maintain a competitive edge in the industry.

Value to our Customers

At **Centroid Plastopack Industries**, we strive to exceed customer expectations by delivering quality PVC Shrink Label Film customised to their requirements. We continually enhance product quality and leverage the latest technology. Our commitment to innovation enables us to produce superior products for the global market. Serving over 20 Indian states and 14 countries, our clients value our exceptional service, dedication, and consistent quality.

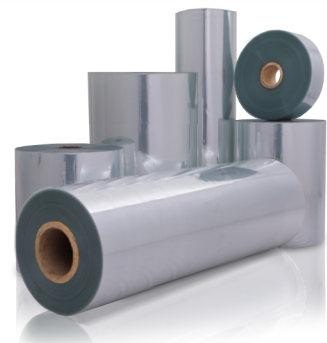

Our product will allow you to improve your business's ordering efficiency and branding processes, and empower you to grow into a champion in your field.

Product Details

Centroid Plastopack Industries manufactures high-quality PVC Shrink Label Film suitable for Label Printing. The easy use and fast shrinking effect of PVC Shrink Label Film reduce energy consumption in the packaging process. Our PVC Shrink Label Film is manufactured in various sizes to meet client requirements. Our high-quality PVC Shrink Film offers flexibility in print/patterns, facilitating the end-customers to successfully promote products and build the brand image by using our branding material.

Product Packaging

At **Centroid Plastopack Industries**, we prioritise high-quality packaging as the foundation for excellence. Using top grade materials and standard practices, we ensure product protection, mindful of material sensitivity and global distribution.

Standard Pallet Packing

Standard Roll Packing

Storage Instructions

PVC Shrink Label Film is heat-sensitive and should be stored in its original packaging at room temperature below 30°C, away from direct sunlight. It should be laid flat, as quality may degrade over extended storage, depending on the film type, roll length, and storage conditions. For optimal results, use the material within 60 to 90 days from the dispatch date.
